This table represents all reported HIV and AIDS cases in Idaho, regardless of residence at first diagnosis or death. This data may include cases also reported in other states. This is a departure from past practices of displaying prevalence of reported cases only among persons first diagnosed HIV and AIDS cases while residing in Idaho.

* Reported HIV cases presumed living - Reported cases of HIV not reported with AIDS EVER REPORTED in Idaho and have not been reported as deceased.

** Reported AIDS cases presumed living - Reported cases of AIDS EVER REPORTED in Idaho and have not been reported as deceased.

*** HIV (+) - Total number of reported HIV seropositive individuals EVER REPORTED in Idaho, excluding AIDS cases.

*** Reported HIV/AIDS cases presumed living - Total number of HIV and AIDS cases EVER REPORTED in Idaho that have not been reported as deceased.

NOTICE

Cumulative HIV/AIDS case numbers for Idaho have decreased due to a nationwide case de-duplication effort between states which was facilitated by the Centers for Disease Control and Prevention (CDC). Please see technical notes on this process. A full report on the impact of de-duplication of HIV/AIDS cases on Idaho's case counts will be forthcoming.

This table excludes cases of HIV or AIDS first diagnosed in other states.

Reports of HIV positive and AIDS cases should be made to the **Office of Epidemiology and Food Protection**, as required by Idaho Code 39-602. Data collection and publication is made possible through a federal grant from the Centers for Disease Control and Prevention, United States -- Department of Health and Human Services. Idaho statistics are posted on the Internet four times per year. To be placed on an e-mail alert group to signal you when a new issue is posted, please e-mail Allen Haumann at haumann@idhw.state.id.us.
